

Groups

An individual treatment plan and schedule will be developed for the inmate, which will address the specific program needs. The purpose of this plan will be to focus on the areas of an individual's life that are most likely to lead him or her back to a criminal lifestyle. This schedule includes up to 6 to 10 hours of classes per week. All participants are assigned to an MRT® group. All additional groups will be assigned based on an individual's needs. Classes are offered throughout the day to accommodate various schedules.

All assigned groups require mandatory attendance and participation. Failure to attend groups as scheduled or failure to participate while in group will prevent the participant from progressing through the Program and can lead to unsuccessful discharge.
