

Merced County Seasonal Flu Clinics

Only seasonal flu vaccine is available at this time, and is strongly encouraged as an effective preventive health measure. H1N1 pandemic flu vaccine is currently in production and is expected to become available for certain high priority populations in late fall, but we have still not received specific information yet about vaccine quantities and distribution dates from the state and federal governments. The Department of Public Health is working closely with local health care agencies to promote the availability of seasonal and pandemic flu vaccine as it becomes available.
